EDUCATION

RGUKT Nuzvid (IIIT)

Bachelor of Technology
in Computer Science Engineering
Grad. 2020 - 2024
GPA : 8.5

RGUKT Nuzvid (IIIT)

Pre University Course
Grad. 2018 - 2020
GPA : 8.4

AP Model School (Karavanja)

Secondary School Certificate
Grad. 2018
GPA : 10.0

SKILLS

Languages

Python, JavaScript, React JS &
HTML, CSS, Bootstrap, Core Java

Databases

MySQL

IDE

Eclipse | IntelliJ IDE, Visual Studio
Code

Version Control

Git

OS

Windows, Linux

COURSEWORK

Data Structure
Algorithms
Computer Architecture
Object-Oriented Programming
Database

09.06.2025

CERTIFICATIONS

Data Structures Course | Coursera
Introduction to Front end Development | Coursera
Programming with JavaScript | Coursera
React | Coursera

EXPERIENCE

VCheck

UI Developer Intern

Dec 2023 – Jun 2024

Pune, Maharashtra

- Worked on a real time project, developing responsive UIs using MUI, React, and CSS based on Figma designs. Integrated frontend components with RESTful APIs, enhancing user experience. Implemented automated UI testing with Playwright and ensured code quality with SonarCloud. Utilized Git for version control, maintaining an organized workflow and effective team collaboration.

PROJECTS

Weather App

React JS

- Developed a weather forecasting app using React.js, Tailwind CSS and the OpenWeatherMap API . I created a user friendly interface with dynamic features, providing real time weather information. Through this project I gained knowledge about integrating APIs to deliver valuable and up to date weather information to users.

Project Management Tool

Python, React JS

- Developed a full-stack, collaborative web application for efficient project and task management. Integrated real-time collaboration features and task updates among team members to enhance user experience from project creation to task completion and tracking. The backend was built using Python/Flask with a MySQL database, while the dynamic and responsive frontend was crafted with React.js. This project demonstrates strong skills in full-stack development, database management, and intuitive UI.
